Unleash the whip!

Target:

Learn about:

- Python data types and operators
- Types of data structure in python
- Control flow (Conditional statements – loops)

Resources:

1) [Udacity](#) Python course   [from lesson 1 to 4] – [Recommended]
2) All-time favorite python [course](#) [English crash course]
3) [Mastering Python](#) by El-Zero Web [Arabic]

Problems:

- Take your notes either hardcopy or softcopy as you prefer. [Highly important]
- Solve the problems below this file. [**DO NOT** import any libraries]
- Watch this [video](#) to know how to use git to upload your beautiful code on your GitHub.
- Upload a Task-1 {name}.pdf file that contains your notes to this [form](#).
  Note: name = last name (for males)
      name = first name (for girls)

Evaluation:

Problems 1, 2, 3: 1 point.

Problems 4, 5: 1.5 points

Problems 6, 7: 2 points

Deadline:

4 Days #Sunday 5 Feb at 23:59
